The serious long term effects of bullying behaviours have long been documented. It is important that schools respond effectively to incidents of bullying while also actively promoting healthy relationships and developing students’ social and emotional skills.

**Stronger Together** is the new Anti-bullying Module of The Peer Support Program for Primary schools. The Module recognises that all members of the school community can play a role in reducing the incidence of harmful behaviours. It builds students’ capacity to prevent and respond to bullying and draws on positive psychology principles such as fostering strengths, gratitude, respect and kindness in students. This develops protective factors and strengthens relationships across the school.

**THE PEER LED MODULE**

In **Stronger Together**, students are taught the skills they need in order to respond effectively to bullying. Students who are bullied, students who bully, and bystanders are all given strategies to assist them in reducing harmful behaviours and their impact. By utilising the powerful peer led format, students help create their own environment in which to thrive. The eight session Module supports students to develop the skills, knowledge and attitudes necessary to make a positive contribution to the creation and maintenance of a safe school environment.

It is assumed that this module is not stand-alone in promoting pro-social behaviours or addressing bullying behaviours. This module is designed to support the review and development of active policies, procedures and initiatives put in place by individual schools. It is only with a coordinated and collaborative approach that safe and positive environments can be created to benefit everyone.

**ORDER RESOURCES AND TRAINING ONLINE**

www.peersupport.edu.au

All prices are listed online. Schools will be invoiced for their purchase once an online order is received. All prices are inclusive of GST and postage.
